|           |                   |             |        |       |           |            |         |
|           |                   |             |        |       |           |            |         |
|           |                   |             |        |       |           |            |         |
|           |                   |             |        |       |           |            |         |
|           |                   |             |        |       |           |            |         |

Summary of attachments by Vendor:

## Notes

- (1) For ducting, piping and components on package units equipment, Vendor shall submit together with this sheet also sketches or isometrics, showing layout and quantification of refractory work.
- (2) Measured over neutral line in the refractory.
- (3) NOT means normal operating temperature in equipment.
- (4) Vendor to indicate YES or NO in this column.
- (5) Vendor to state reference to applicable specifications such as: Company/purchaser's specifications or Vendor's attached refractory data sheets.
